

Disability and Data in Education Programming: Considerations for Inclusion

This panel discussion will explore recent efforts and evidence to improve the quality of disability data in USAID-funded education programs with a focus on balancing the needs and priorities of education activities and the ultimate goal of screening leading to educational supports and services for children with disabilities. Discussants will reflect on what has been learned to date, how it fits program needs, and implications for the future.

**Wednesday
April 17, 2024**
